

# Assignment –Python-Program

**Name:** Gourisankar Bhuyan  
**Roll No:** CSB24065

---

**Question:** Create a python program using list and dictionary to store products with name and stock quantity. Display all the products whose stock is less than 10

## Source Code:

```
my_store = {}

while True:

    key = input("Enter a fruit (Enter quit if you want to quit)")

    if key.lower() == 'quit':

        break

    value = int(input(f"Enter it's quantity - {key} :"))

    my_store[key] = value

for fruit in my_store:

    if my_store[fruit] < 10:

        print(fruit)
```

## Source Code:

```
1 my_store = {}
2
3 while True:
4     key = input("Enter a fruit (Enter quit if you want to quit)")
5     if key.lower() == 'quit':
6         break
7     value = int(input(f"Enter it's quantity - {key} :"))
8     my_store[key] = value
9
10 for fruit in my_store:
11     if my_store[fruit] < 10:
12         print(fruit)
```

## Sample Output:

```
PS C:\Users\gauri\OneDrive\Desktop\python programs> python -u "c:\Users\gauri\OneDrive\Desktop\python programs\A4.py"
Enter a fruit (Enter quit if you want to quit)Mango
Enter it's quantity - Mango :67
Enter a fruit (Enter quit if you want to quit)Orange
Enter it's quantity - Orange :3
Enter a fruit (Enter quit if you want to quit)Banana
Enter it's quantity - Banana :9
Enter a fruit (Enter quit if you want to quit)quit
Orange
Banana
PS C:\Users\gauri\OneDrive\Desktop\python programs>
```
